Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

I am writing to express to you my support for the DOE's recommendation to open Yucca Mountain as the nation's first spent fuel repository. The DOE has spent decades researching the site and about \$7 billion to confirm its suitability. All concerns brought up by the anti-nuclear movement in the United States have been adequately addressed and resolved.

I hope you will support the opening of Yucca Mountain by basing your position on scientific studies and facts rather than the unscientific fear mongering by the vocal minority of anti-nuclear activists.

Best Regards,

Timothy C. Steadham, P.E.
